## A-LEAF, 24 months meeting & participation in ICT 2018

This time, the consortium meeting took place in Vienna. The Vienna University of Technology, TUWien, participates in the project through the Surface Physics research group, led by Ulrike Diebold. They hosted and organized a great half-way meeting on the 3rd of December. Many thanks!

And more news from Vienna, the A-LEAF project was invited to participate in the [ICT2018](#) event, that gathered more than 6000 visitors from 120 countries. Our FET project was present in booth C12, a truly enjoyable experience!

Grant agreement  
732840-A-LEAF

## Very Interesting!

A-LEAF featured in a popular Spanish Science Magazine

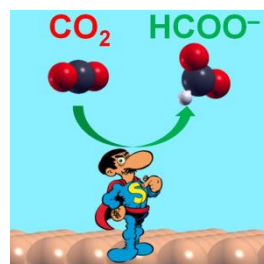

The Spanish Magazine [Muy Interesante](#) - 'Very Interesting' in English- is one of the most popular Science magazine among the Spanish population, published in its September issue a 6 pages full article about the A-LEAF project. Wow!

Check the last publication of the [DIACAT](#) project!

Colloidal suspensions of monodisperse diamond core-shells, *Diamond and Related Materials*, **2018**, 89, 122-131

DOI: [10.1016/j.diamond.2018.08.004](https://doi.org/10.1016/j.diamond.2018.08.004)

Keep tuned if you want to read the latest publications from the A-LEAF consortium! Coming soon...

Solar-Driven Chemistry Call for Proposals 2019/2020

The EuChemS and DFG initiative has received the support of 5 national funding organisations: Finland, France, Germany, Poland and Switzerland. Together they have just published an international call for proposals, see the call conditions [here!](#)
